#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 79-82, 84, 89, 107 are rejected under 35 U.S.C. 102(e) as being anticipated by US patent #6,184,886 (Bates et al).
  - As for claims 79, 107: Bates et al (hereinafter Bates) teach a computer implemented method and corresponding system for tailoring a user interface favorites menu for a user (1:64 2:27. Per Bates, the term "Bookmark" is being equivalent to "Favorite" (2:2-13)), comprising the steps/means for providing a first favorites menu related to first content and configured to enable access to the first content by users having a first demographic characteristic, providing a second favorites menu related to second content and configured to enable access to the second content by users having a second demographic characteristic different from the first demographic characteristic (i.e., different user profile has a different set of content, 7:46-57), receiving an online identifier for a user; accessing a demographic characteristic associated with the user in a database based on the online identifier for the user (7:47-50), based on the

Application/Control Number: 09/224,211 Page 3

Art Unit: 2179

demographic associated with the user, automatically selecting a selected favorites menu from among a plurality of favorites menu that include the first and second favorites menu (7:51-57), automatically making the selected favorites menu perceivable to the user, the selected favorites menu containing a plurality of links, each link selectable to access a particular content item (fig. 2; 3:30-34, 6:2-30), and enabling the user to manually add/remove links to/from the plurality of links in the selected favorites menu for that user (7:15-38), where subsequent perception of the selected favorites menus reveals a menu of favorites that includes added links and excludes removed links (3:35-40, 7:53-61, 8:11-9:50).

- As for claim 80: It is inherently included in Bates' teaching of the "Bookmarks" menu in the menu bar of figure 2 that the "Bookmarks" menu comprises a drop-down menu (evidences of the inherency can be found in Bates' US 6,557,015, figs 10, and US 6,832,350, fig 14). The content of bookmarks drop-down menu associated with a first user profile is different to the bookmarks drop-down menu associated with a second user profile).
- As for claim 81: The menus are links to contents from various remote sources (fig. 2, 1:64 2:13).
- As for claim 82: The remote sources include a network service provider (e.g., yahoo, ibm. Figure 2).
- As for claim 84: The content includes Internet content (fig. 2, No. 225).
- As for claim 89: The user favorite menu is automatically generated and presented to the user (1:64 2:13, 7:46-57).

Application/Control Number: 09/224,211

## Claim Rejections - 35 USC § 103

Page 4

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 83, 85-88 are rejected under 35 U.S.C. 103(a) as being unpatentable over US patent #6,184,886 (Bates et al).
  - As for claim 83: Bates fails to clearly teach that the content includes e-mail.

    However Official notice is taken that implementation of bookmarking Email is well known in the art (see US 6,487,557, fig 6, and US 2002/0107946, par 0004). It would have been obvious to one of skill in the art, at the time the invention was made, to combine the well-known implementation of bookmarking Email to Bates. Motivation of the implementation is for providing a shortcut to the bookmarked Email.
  - As for claim 85: Bates fails to clearly teach that the content includes chat session.

    However Official notice is taken that implementation of bookmarking Email is well known in the art (see US 6,832,350, fig 14). It would have been obvious to one of skill in the art, at the time the invention was made, to combine the well-known implementation of bookmarking chat session to Bates. Motivation of the implementation is for providing a shortcut to the bookmarked chat session.
  - As for claims 86, 88: While teaching of user profiles, Bates fails to clearly teach that the user profiles include maturity level of the user. However Official notice is taken

Application/Control Number: 09/224,211 Page 5

Art Unit: 2179

that implementation of user profile having maturity level of the user is well known in the art (see previously cited 5,835,087, 4:55-56, 35:50-67, 37:55-60). It would have been obvious to one of skill in the art, at the time the invention was made, to combine the well-known implementation of user profile having maturity level of the user to Bates. Motivation of the implementation is for filtering information to be presented to the user.

As for claim 87: While teaching of user profiles, Bates fails to clearly teach that the user profiles include child maturity level. However Official notice is taken that implementation of user profile having maturity level of the user is well known in the art (see previously cited 5,835,087, 39:40-46, 48:19-26). It would have been obvious to one of skill in the art, at the time the invention was made, to combine the well-known implementation of user profile having child maturity level to Bates.

Motivation of the implementation is for filtering information to be presented to the child.

### Response to Arguments

5. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

Application/Control Number: 09/224,211 Page 6

Art Unit: 2179

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ba Huynh whose telephone number is (571) 272-4138. The examiner can normally be reached on Mon - Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Weilun Lo can be reached on (571) 272-4847. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
